

Issue of Concern: Ollie's new road, old road and hotel

- Affecting 2 sides of town
- Building upper floor in Jan.
- The hotel job was shut down at one point
- Road has major erosion issues
- He made a road above the new road sending erosion to slope, into creek, whipped numerous trees out with numerous large iguanas
- Currently there is a crew with surfacing with bricks. No retention wall. Dirt and rocks are being pushed Mantecon lot. No retention wall
- He has no building permit, no concession on federal zone, and no permit for building Villa Amor that high
- The structure authorization is still before the courts (he could pay off the judge)
- He has paved a public road looking as if it is his

Objective:

- Stop / control the building of road / erosion control/ Provide mitigation plan for road
- Halt building in Villa Amor
- Setting a precedence for maintaining public use - Camino de paso/have a 'calle publico' sign

Strategy:

- Find permit for road (semarnap/profepa) if it has been approved – can we serve ourselves?
- Harvey will photograph road
- Checking status of top story and ownership of Villa Amor
- Sz to find permits
- Opinions – how we address Sz and if he has a permit
- Looks like in in fed zone – concession? Harvey says Cuevas says he doesn't have permit – someone from Valle shut down the hotel job – Harvey believes it is t-15 and only 3 stories – where does CUC start/end
- Seek demanda from DF
- Get information, solicit demandas from group on their issues of concern

Time/Cost Estimate
